DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the method steps, for example,

Executing a first test...;

Preparing execution of a second test...;

Processing test data resulting from the first test; and

Executing the second test concurrently with the processing of the test data;

Configuring hardware elements...;

Executing one or more test scripts...;

Identifying hardware elements...;

Configuring the hardware elements corresponding to the second test;

Storing test result data ..., must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. **Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended.**

The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must

Art Unit: 2117

be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000.

Art Unit: 2117

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 2-13, 16-17, 21-24 and 26-34 are rejected under 35 U.S.C. 102(e) as being anticipated by Chun et al (US 2003/0154047).

As per claims 2-11, Chun et al disclose a method of testing at least one mixed signal semiconductor device, these mixed signals are independently test (see paragraphs (0037) and (0049)). Therefore, Chun et al's invention meet the method steps of:

executing a first test for the at least one mixed signal semiconductor device;
preparing execution of a second test for the at least one mixed signal semiconductor device concurrently with the executing of the first test;
processing test data resulting from the first test; and
executing the second test concurrently with the processing of the test data;
wherein the mixed signal semiconductor testing is performed by a single processor.

As per claims 12-13, 16-17, 21-24 and 26-34, these claims are rejected under similar rationale as set forth in claims 2-11.

4. Applicant's arguments with respect to claims 213, 16-17, 21-24 and 26-34 have been considered but are moot in view of the new ground(s) of rejection.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phung My Chung whose telephone number is 571-272-3818. The examiner can normally be reached on Monday to Thursday.

Art Unit: 2117

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jacques Louis-Jacques can be reached on 571-272-6962. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
